

Budapest Science Camp

Date: 28.10.2018–03.11.2018.

Let's make a startup!

In 2017, the International Summer Science Camp took place for the first time in Budapest, Hungary. The one-week long camp gathered 100 students from 20 countries from all over the world.

The main technological topic was: test and improve the Budapest Science City Mobile Application.

Encouraged by the great success of that first camp, we are pleased to announce the organisation of a second, similar event this autumn. The topic of this year is:

LET'S MAKE A STARTUP!

The participants will gain knowledge from 10 successful innovative Hungarian companies by involving them in technological challenges.

Outlines of the 2018 Budapest Science Camp

Application: Future participants will have the opportunity to choose 3 out of 10 successful Hungarian startups - please mark them in order of interest. As soon as we receive their choices, we will assign to them one of the three chosen startups.

Preparation: The participants will be assigned to 10 different groups according to their field of interests. Before the Science Camp the group members will have to get in online contact with each other to prepare their own startup idea. Each group will be designated to a specially-trained animators who will send informations about the chosen innovative company, a Helping Handout and a global summary of the Startup Ecosystem.

Participation: During the Science Camp, invited experts will give daily lectures on economical background, international legal advices and mentoring the groups for the final presentation and pitching.

In the first three days of the camp participant will have the opportunity to follow the given startup's everyday activities. The companies will deal out specific tasks which challenges also for the professionals. The objective of this camp is to emphasize on the importance of the practice oriented learning, teamwork and the development of presentation skills.

Presentation: During the closing event, students will have the opportunity to present their own startup in front of a jury, which will consist of selected professionals and investors. The 3 best conceptions will be awarded with valuable prizes!
